#5 There are significant gaps when it comes to funding with a racial justice lens.

.....

COVID-19 showed the world that health and racial justice are connected.

In 2018, less than 1% of all U.S. foundation grant dollars supported health rights of racial and ethnic groups.

Mapping Funding for Racial Justice: A Political Imperative

July 21, 2021

By Ana María Enríquez, HRFN Executive Director, and Kellea Miller, PhD, HRFN Deputy Director

Since 2010, Human Rights Funders Network (HRFN) and Candid have partnered on research that maps funding for human rights globally. Our analysis provides an evidence base to understand and strengthen resourcing for social change.

Over this time, we have had a glaring omission: our research has not captured funding related to race or ethnicity, despite significant and global human rights work in this area.

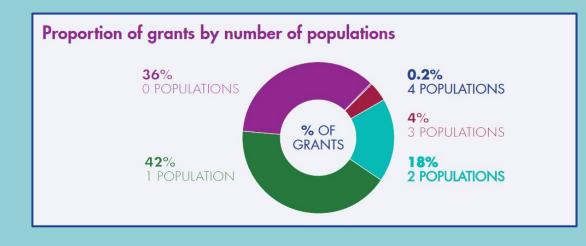

Though we will explain in greater detail below what this has meant and how we are addressing it, we first must acknowledge and own the impact. We have not lived up to HRFN's potential to contribute to a more coordinated philanthropic response to systemic racism and inequality. And we have compounded the invisibility of those working for racial justice, Black liberation, and equity based on ethnic or racial identity. We are changing our analysis and shifting our practices to be fully accountable to racial justice movements.
